Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Berger et al, newly cited (but which is the U.S. equivalent of DE 195 24 729). The deflection rollers 23, 26 of Berger et al, Fig. 2, would inherently function to absorb transverse stresses in the strip since they are the same sort of partitioning device used by applicant, i.e. a roller. The strip in Berger et al is wedge-shaped as in applicant's device, and the deflection rollers are adjustable toward and away from the strip, see the paragraph beginning on line 64 of col. 3.

Response to Arguments

3. Applicant's arguments filed 9/26/02 (concerning the DE reference) have been fully considered but they are not persuasive. Applicant argues that the reference does not disclose that the deflection rollers absorb transverse stresses and thus do not anticipate or imply similar functionality. However, if a claimed element is identical to what is shown in the prior art and is used in the same way, as in Berger et al, then whatever function that that claimed element performs would inherently be performed by the prior art element. See *In Re Best*, 562 F.2d 1252, 1254, 195 USPQ 430, 433 (CCPA 1977), MPEP 2112.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
